(54) KEYWORD EXTRACTING DEVICE

(57)Abstract:

PURPOSE: To provide a keyword extracting device by which a keyword can be speedily extracted by a simple processing by suitably setting an object to be defined as a keyword candidate without limiting it to one word.

CONSTITUTION: The component of a sentence such as a word, long compound noun, 'noun + of + noun', 'noun + doing + noun' and 'noun + being + noun' is segmented from an inputted document, the segmented components of the sentence are successively registered as keyword candidates while counting the frequency of appearance, and the keyword is extracted from the registered keyword candidates while considering the frequency of appearance at least.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application]
